Dear Hiring Manager,

My name is Panha Koeun, and I am writing to apply for the Web Developer Intern position at your company. I recently saw your social media post about this opportunity, and after reviewing the requirements, I am very interested as I believe my skills and knowledge align well with the position.

I am currently a Web Development student at Passerelles Numeriques Cambodia, where I have built a strong foundation in both technical and soft skills. I have hands-on experience with HTML, CSS, JavaScript, TypeScript, PHP, Laravel, React.js, Postman, and MySQL. In addition, I am familiar with tools such as Git, GitHub, Jira, and basic cloud technologies for project deployment.

During my studies, I have completed several practical projects, including a shoe shop website, an e-commerce platform, and a Telegram chatbot. I also developed a face attendance system using Python. These experiences have strengthened my problem-solving abilities, teamwork, and practical coding skills.

As part of a virtual company project, I took on the role of Scrum Master while collaborating with my team to build a Coffee POS system. I contributed to both frontend and backend development, managed tasks, and helped improve system performance, database structure, and user experience.

I am a motivated and responsible individual who enjoys learning new technologies and working in a collaborative environment. I am eager to apply my skills and contribute to your company's success.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and enthusiasm can benefit your team. I look forward to hearing from you.

Respectfully,

Panha Koeun
